

Is Your Business Ready For A Pandemic?

H1N1 is not just a medical or public health challenge – it's a business issue that affects everything from operations to employee absenteeism. While pandemic preparedness has been an important part of business continuity planning since SARS and the Bird Flu, many companies were unprepared for the recent H1N1 outbreak.

The World Health Organization advises that pandemic outbreaks occur typically in three waves, each with increasing strength. Although it may seem like the worst is behind us, researchers are predicting an all out influenza pandemic this fall. The CDC has indicated that "as many as 40% of Americans could catch the H1N1 flu virus over the next two years". All businesses, hospitals and government agencies will feel the effects of the pandemic with 15 to 35 percent of the workforce expected to be ill.

WHAT YOU SHOULD DO

- ✓ Encourage all employees to take everyday actions to stay healthy:
 - Cover your nose and mouth with a tissue when you cough or sneeze. Throw the tissue in the trash after you use it.
 - Wash your hands often with soap and water, especially after you cough or sneeze.
 - Use a waterless hand sanitizer when soap and water are not available.
 - Avoid touching your eyes, nose or mouth. Germs spread that way.
 - Stay home if you get sick. CDC recommends that you stay home from work or school and limit contact with others to keep from infecting them.
- ✓ Make certain that all washrooms are fitted with an appropriate sealed hand soap dispensing system.
- ✓ Issue personal size and/or desk top size hand sanitizer to each employee and place hand sanitizer dispensers at facility entrances and in high traffic areas.

HOW DEB CAN HELP

- ✓ When it comes to common germs found in the workplace, InstantFOAM hand sanitizers kill up to 99.9999% in just 15 seconds.
- ✓ No hand sanitizer can prevent H1N1 but it can be an important aspect of an effective pandemic preparedness plan.
- ✓ In vitro testing of Deb InstantFOAM formulations, to determine effectiveness against the H1N1 virus, has been successfully completed.

A flu pandemic can cost the economy billions of dollars in lost productivity and medical expenses. Being prepared is the best way to ensure business as usual.

Contact your Deb representative and let us help you keep your company and your employees safe this flu season.
